Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tung et al. (US 6,528,969) in view of Shy (US 6,215,273) and further in view of You (US 6,501,246). Tung discloses a mobile charger having a housing unit 24 and a receptacle to house a power source to charge the mobile device. First, it does not disclose a second receptacle to house a cord 3 which is used to connect the charger to the device. Shy discloses a charger for a larger device wherein a receptacle 40 is used to house the cord 46. The receptacle is screwed 17 onto the main housing and the back end is flat while the front end has a contour to match the overall housing. It would have been obvious to one having ordinary skill in the art to have included a chamber to house the cord so the user does not lose the cord. Second, the power source is not in parallel with the connector when the two are connected and the connectors are cigar-type plugs. You discloses another type of mobile charger wherein the power source or batteries are in the same axis with the plug when the plug is connected to the mobile phone. It further includes a cover for the plug to prevent contaminants from coming into

contact with the terminals. It would have been obvious to one having ordinary skill in the art to have oriented the position of the batteries so that a slim profile is achieved and since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70. Moreover, it would have been obvious also to one having ordinary skill in the art at the time the invention was made to have used any type of connectors including cigar-type connectors, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. And the use of cigar-type connectors is well known in the art of battery charging.

Conclusion

Any inquiry concerning this communication should be directed to the Examiner at the below-listed number on every Tuesday, Thursday and Saturday.
